Finding Family

FALL 2016 GENEALOGY SERIES

September 13 ***Researching the 1940 Census***

The 1940 census is one of the most important genealogical resources released in the past decade. Come learn the basics about the 1940 census and how to research it.

October 11 ***Introduction to National Archives Indexes on the German Genealogy Group Website***

Join **Don Eckerle,** longtime NARA Volunteer and member of the GGG, as he provides an overview of the free searchable indexes on the GGG website, including the seven new databases highlighting records of the National Archives at New York City.

November 7 ***Searching for Siblings to Find Family: Help Among the Collaterals***

Professional Genealogist **Roger Joslyn** will use several case studies to demonstrate why you should take time from the "pedigree chart syndrome" and learn more about sisters, brothers, aunts, uncles, cousins, and other relatives. Knowing about other kin can properly define your ancestral families, and studying the "collaterals" solves many genealogical problems.

December 13 ***Ask the Experts***

Come ask **Connie Potter** (retired NARA archivist and genealogist), **Roger Joslyn,** and **Leslie Corn** (both Certified and Forensic Genealogists) questions about navigating your genealogical research journey. The panel will also provide examples and tips to aid your research.

All programs run from noon-1 p.m. in the 3rd floor Learning Center. All programs are free and open to the public. Please register at *newyork.archives@nara.gov* or 866-840-1752 to reserve a space.
