AEROSPACE RESCUE AND RECOVERY SERVICE (ARRS) MISSION RECORDS (Table 64-1) (Applicable to the Aerospace Rescue and Recovery Service)

The purpose of this submission is to revise disposition authorities for records of closed and suspended rescue and recovery missions and to establish disposition authority for certain incident logs.

Closed and suspended mission records consist of narrative logs, message reports, and related correspondence concerning missions that were closed or suspended prior to the location of the objective. Our proposed revision establishes separate series for "closed" and "suspended" mission records with parallel retention periods.

Incident logs consist of logs and correspondence pertaining to incidents which did not progress into search missions. They are used to record initial reports from FAA and other agencies of possible distresses. SAR stands for Search and Rescue; ELT stands for Emergency Locator Transmitter. A one-year retention period will satisfy our current requirements.
