380 - Security

~~Background Information systems used by security managers, special security officers, and management control administrators whose function involves protection and preservation of military information, including security of the Government in domestic and foreign affairs. These systems concern identification, classification, downgrading, protection, storage and destruction of classified defense information, access to classified data, and other matters pertaining to security. Information relating to restricted data, sensitive compartmented information, communications security, and special access programs, programs involving industrial security, telecommunications and signal security involving the preparation, transmission, and communication of information by electronic means, security awareness, and requirements relating to computer security.~~

These systems support processing of special liaison soldiers who have been assigned continuous full-time duties as security access personnel

RN 380c
Title Security System Master File
Authority TBD
PA A0380-67DAM

Description Contents in these systems consists of information showing access authorizations, including names, clearance information and classification types, personnel security information for employees and visitors used to control access to buildings and grounds, list of personnel who have access to offices, personnel bios, organization charts, and case management workload tracking data. All input is electronic in the form of digitized fingerprints, iris scans, facial photos, voice recordings, and contextual information. Output is identification badges.
