**SECTION 1****FILING PROCEDURES**

1. **Background.** The size and complexity of the Navy demands standard methods for filing paperwork. Standardization frees personnel from learning new filing systems when moving from one activity to another.

2. **Filing procedures.** To maintain files effectively and economically follow these procedures.

a. **File Location and Control.** Maintain a central control of activity files. Your central control should:

- (1) Assign personnel to coordinate all activity files
- (2) Authorize official files and assign responsibility for files plans
- (3) Locate the official files at an organizational level that ensures effective documentation, makes records accessible to major users, minimizes duplicate files and aids records disposal.
- (4) Determine records retention and disposal standards using SECNAVINST 5212.5C and apply to each file series and prepare local disposal instructions.
- (5) Perform periodic reviews of the files procedures.

b. **File Material.** Do not include unnecessary working papers, early drafts, extra copies, or information material as part of the file material. Include the following:

- (1) The incoming document
- (2) Copy of the outgoing correspondence
- (3) Any essential supporting documents.

c. **File Maintenance.** File material loose in folders unless you need fasteners to hold pages in a particular order. Use prong fasteners rather than staples, clips or rubber bands to hold material.

3. **Cross-referencing.** When a document concerns more than one subject, name or case, file an extra copy under each subject and give the location of the basic document on each copy. If extra copies are not available, use a Cross Reference Sheet (OF-21).

4. **Charging Out Files.** Keep track of all documents removed from files. When a document or an entire file is removed, put a charge out slip in its place. If the document is transferred among several people update the charge out slip. Optional Forms 23, 24, and 25 can be used as chargeout slips.

5. **Closing Files.** Close general correspondence files at the end of each calendar year. Close budget and accounting files at the end of each fiscal year. Some other files, most often case files, stay current until an action ends or event occurs. Hold

20 OCT 1987

closed files locally in an inactive status until destruction or transfer to a Federal Records Center using standards in SECNAVINST 5212.5C.

**6. Additional Information.** Additional filing procedures information is available in the General Services Administration (GSA) handbook, *Files Operations*, GPO 022-002-00088-1.

## SECTION 2

CONSTRUCTION OF STANDARD SUBJECT  
IDENTIFICATION CODES (SSIC)

1. **SSICs Required.** An SSIC is a four- or five-digit number that stands for the subject of a document. SSICs are required on all Navy and Marine Corps letters, messages, directives, forms and reports. The use of SSICs provides a tested method for filing documents consistently and retrieving them quickly.

2. **SSICs.** The Navy's SSIC system is broken down into 13 major subject groups. These major subject groups are then broken down into primary, secondary, and tertiary subdivisions. Primary subjects are designated by the last three digits of the code number. For example, here are three of the primary subdivisions under General Administration and Management, whose major subject group code is 5000.

General categories use zeros

5000 General Administration and Management

This is an example of a primary subject

5200 Management Programs and Techniques

The last two digits designate secondary subjects

5210 Records Management

The last digit reflects a tertiary subject

5211 Filing, Maintenance, Protection, Retrieval, and Privacy Act Systems

Some subject groups are not subdivided below the primary breakdown. Some groups are divided into many secondary and tertiary subjects depending on the complexity of the major subject.

3. **Assigning the Right SSIC to a Document.** When you create a document, include the SSIC that most closely describes the document's subject. When assigning the code, consider the subject, the purpose or significance, and the manner in which similar documents are requested and the code used for similar documents.

4. **Arranging Files by SSIC.** When you close one year's files and start new files, make up files for the SSICs that are likely to occur most often. Add new folders later on as documents with new SSICs arrive for filing. The SSICs listed in section 3 provide all the divisions that most activities need to keep their files manageable. However, large activities may have to supplement this directive using the guidance on subdividing SSICs. Paragraph 5 below shows ways to subdivide SSICs.

5. **Subdividing SSICs.** When subdivisions of SSICs are necessary for local file purposes, you may use the SSIC with an SNDL code, additional numbers or words, two SSICs, or combinations of these. Some examples of each are as follows:

20 OCT 1987

**SNDL CODES**

Code	Designated File
5216/24D2 (SSIC with SNDL code only)	Correspondence/Commander Naval Surface Pacific Fleet
5215/FA6/JAX (SSIC with SNDL code and geographical location)	Directives/Naval Air Station LANT Jacksonville
6240/A5/BUMED (SSIC with SNDL code plus activity abbreviation)	Hygiene and Sanitation/Bureau of Medicine and Surgery
1050/29E1/DD979 (SSIC with SNDL code plus ship's abbreviated hull designation and hull number)	Leave and liberty/Destroyer LANT/USS Conolly

**ADDITIONAL NUMBERS, SUBJECTS OR WORDS, OR TWO SSICs**

SSIC with Numbers

5441	Status of Vessels
5441/1	Surface Units
5441/2	Submarine Units

SSIC with Subjects

5212/Disposals	
5212/Transfers	

Two SSICs

## CIVILIAN PERSONNEL 12000 - 12999

Therefore, additions and deletions are made based on FPM changes. It includes no indentions at the secondary or lower level numerical breakdowns, as does the rest of the manual, since in this case they would not necessarily represent homogenous subdivisions of subject matter titles.)
